[Access Shale Gas Reporting System](#)

About Shale Gas Reporting System

SGRS is a web based application hosted at DGH for online entry of Shale gas Data. Please read carefully below the system requirements to run the SGRS application.

How to access Shale Gas Reporting System

Recommended browsers: Google Chrome 36+, Mozilla Firefox 26+, Internet Explorer 10+.
It is recommended you update your browser to the latest version for the best experience.

- First you need to install the DGH Root CA certificate in your browser. You may download it by clicking [here](#).

- The next step is to install the certificate you have downloaded. We have provided a manual for installing the certificate in your browser. Please download the [Instruction Manual here](#) and install the certificate.

- Once the certificate is installed, you may access the [Shale Gas Application](). You will need to login with your Userid and Password. If you donot have valid login credentials, then you may contact DGH.
