Revenue Management System (RMS)

Access Revenue Management System

About Revenue Management System

RMS is a web based application hosted at DGH for online entry of revenue details of gas/oil. Please read carefully below the system requirements to run the RMS application.

How to access Revenue Management System

Recommended browsers: Google Chrome 36+, Mozilla Firefox 26+, Internet Explorer 10+. It is recommended you update your browser to the latest version for the best experience.

- First you need to install the DGH Root CA certificate in your browser. You may download it by clicking here.

- The next step is to install the certificate you have downloaded. We have provided a manual for installing the certificate in your browser. Please download the Instruction Manual here and install the certificate.

- Once the certificate is installed, you may access the [Revenue Management Application](). You will need to login with your Userid and Password. If you donot have valid login credentials, then you may contact DGH.
