

[Access ECMS through New SSL-VPN client](#)

Kindly go through this [Comprehensive document for SSL-VPN client installation](#)

Please go through the below mentioned screenshots for installation of SSL-VPN client on Google Chrome.

About ECMS Applications

ECMS is the web based application hosted at DGH for filing online application for issuance of Essentiality certificate. Please read carefully below the system requirements to run the ECMS application.

[Top](#)

System Requirement

To access the ECMS application your computer needs to be a client of DGH network. To achieve this, you need to establish a connection with DGH's network through a SSL (Secure Socket Layer) based VPN client. The SSL client used in this application is called AccelPro client.

To properly install AccelPro you need a browser with latest Java Runtime Environment. The recommended environment is Windows with IE/Google Chrome/Firefox.
