- In case of project sites located within **100 m** of Protected Areas, applications are often submitted without a distance certificate authenticated by the Wildlife Warden.
- This leads to delays in assessment and appraisal of the proposal.
- Please evaluate using the GIS proximity tool in the Common Application Form for guidance and kindly ensure that a distance certificate authenticated by the Wildlife Warden is uploaded.
- In case the original language is not English or Hindi, kindly upload a notarized translation of the same.
